STUTTER LIVE

THE ISSUE

A speech disorder is a difficulty that somebody has to overcome but it should be for no reason something that will prevent somebody from fulfilling his dreams. Unfortunately, formal education can not pass this message to people regardless if they stutter or not. As a result, people who stutter remain excluded and consider Stuttering as something that tortures them from the beginning of their life. Hence, there is a certain challenge for third sector organizations to come up with effective projects and assist the formal education efforts to address the inclusion of people who Stutter.

Rowan Atkinson, King George, Demosthenes, etc are just a few examples that prove that a speech disorder cannot exclude somebody from being active in society if he/she overcomes the logophobia. According to those ideas and observations, Stutter Live was initiated in order to help society to include people who stutter and to raise awareness of what stuttering is.

THE STUTTER LIVE PROJECT

Stutter Live is an Erasmus+ Youth Action with Two Activities that are deeply connected with each other. Following the principle of Knowledge + Practice = Success we will organize:

- >Stutter Live: Training Course (A1: 08-13/10/2020)
- >Stutter Live :Youth Exchange (A2: 20- 28/8/2021)

Curious about what happened in the Training Course ?

- Create a safe environment in which everyone will express freely and emphasize only on the content of what they say, not the way.
- Improve participant's public speaking skills and deal with logophobia.
- Promote the benefits of Erasmus+ in the local community
- Give space to youth workers to practice their own workshops under our supervision
