SUMMARY

The project "Burgos 2021: Our Heritage, Our Future" aims to create relations and collaborations between European associations working in the field of youth and in the field of cultural, artistic and social heritage . The project aims to develop joint projects and educational strategies based on non-formal methods capable of increasing awareness of the relation between youth and culture and between art, traditions, culture and future.
The desire to deepen the link between cultural heritage and young people comes from the fact that in 2021 the city of Burgos celebrates the 800th anniversary of its cathedral and this event led us to reflect on many factors. The anniversaries of historical, social and cultural events allow us to preserve our memory but above all they help us to become aware of where we come from, where we are going and therefore who we are. Young people are often not aware of this, they are disinterested and they don't actively participate in these events, as they only very rarely have the opportunity to express themselves, to learn and to become personally involved. Understanding where we come from is an opportunity to define where we are going, and this is a question of fundamental importance for Europe and its future. Cultural heritage unites Europe through its history and common values, it brings people together and helps us to build more cohesive societies. Europe needs more cohesive and inclusive societies that give citizens the chance to play an active role in democratic life.
