NO HATE SPEECH MOVEMENT

No hate also known as hate speech does not have a single and universally accepted definition, it covers all forms of expression that spread, incite, promote and justify racism, xenophobia, anti-Semitism and other forms of hatred based on intolerance, among them intolerance based on aggressive nationalism and ethnocentrism, discrimination and hostility towards minorities, immigrants and people with immigrant roots.

The enduring values of the No Hate Speech movement are equality, human dignity, human rights and diversity. We oppose hate speech, racism and discrimination.

Goals of the movement:

- Raise awareness of online hate speech and the risks involved for democracy and youth. We want to increase people's conscious ability to read traditional and Internet media.
- Support young people's advocacy for human rights online and offline.
- Reduce online acceptance of hate speech in society
- Mobilize and train young human rights activists and network them
- Map cases of online hate speech and create tools for a constructive response
- Support and show solidarity with those who have been victims of hate speech
- Support joint developments and the creation of tools at European level to counter hostilities
- Support online participation and active citizenship
